Upstream Americas Contractor Home Page

Protection of both the health and well-being of all employees and contractors and protection of the environment are of utmost concern to Shell Upstream Americas. To effectively manage contractor HSE performance, Shell UA utilizes the Contractor HSE Management Process (**CSMP**).

This process describes the identification, assessment, and control of HSE-related risk incurred by using contractors to provide services. Shell UA includes contractor HSE performance in its reported progress toward targets and expects all Shell and contractor employees to participate equally in achieving HSE objectives.

In addition, we are committed to following the [UA HSE Commitment and Policy](#).

Document Management Communications

Protecting the **health and well being** of all employees/contractors and **protecting the environment**, as detailed in the UA HSE Commitment & Policy, is of utmost concern to Shell Upstream Americas (UA). In order to comply with this **commitment and policy**, UA employees and contractors must meet the requirements communicated in UA controlling documents located on the [Standards/Procedures/Guidelines](#).

The following newsletters provide information on obtaining access to our **SPG** web page as well as providing an overview of **new and updated** UA HSE and Operations documents.
