

BOOST Champion Conference

Sept 21st – 22nd
Hunting for Hazards

BOOST CHAMPION CONFERENCE

- What does it mean to be a Safety Champion:
 - The Safety Champion process is designed by the BOOST Team to help foster the BBSM Process on Shell's offshore locations. The goal is to identify members of each partner in safety crew on each location (I&E/Construction).
 - The Safety Champions are then trained on how to perform quality observations, give feedback (positive) from observations and mentor other observers.
 - The Safety Champion's are responsible for completing observations daily, interfacing with facility steering teams, & completing the daily Champion Report. They are also responsible for discussing the BBSM data in morning & weekly safety meetings.
 - Safety Champion Reports are sent into Partner's In Safety on a weekly basis, where the reports are used to gauge the effectiveness of the BBSM process on various locations & the reports are discussed in monthly BOOST meetings through call-in's with the various locations.

BOOST CHAMPION CONFERENCE

- Goals:
 - To recognize Safety Champions for their hard work and commitment to the BBSM process
 - To show support from Shell & all the Partners in Safety
 - To emphasize roles & responsibilities
 - To strengthen Safety Champions understanding & knowledge of the BBSM Process
 - To foster team building & to have fun

BOOST CHAMPION CONFERENCE
